

Just finished up a large job for a Hotel in the Caribbean. Seven weeks of shipping 1, 2, and sometimes 3, 40' refrigerated trailers full of container trees and plants. It was quite an undertaking.

Our main base was Botanics Wholesale, in Homestead Florida. They showed themselves to be quite efficient. It's a well-kept nursery with plants and trees that are healthy, lush and green. They proved to us that they can provide quality and quantity. Plus, over and above their own stock, they have a fantastic broker.

A huge thank you to Douglas. His expertise and ability to locate every single plant we asked him for was amazing. He knew where to find it and maintain the quality we needed throughout the entire job. Even when we got last minute changes thrown at us, he took it in stride and always came through. Let me tell ya - his level head helped me keep my sanity several times. Our clients were very pleased with everything.

Another thank you to everyone at Botanics Wholesale who proved they have the ability to handle big jobs. From the loaders to the office, they all did their part and we very much appreciate it.
